DuraLex dura-WOOD® is a satin finish wood sealer with a blend of tough acrylic resins. It will not flake or peel and has extremely good resistance to water and weathering. It has excellent penetrating and adhesion properties and is available in clear or a range of beautiful wood colours.

DuraLex hydra-DECK® is a water based acrylic deck coating that comes in a range of appealing, transparent timber colours. Water repellent, it will condition timber as it protects, will not flake or peel and is easy to recoat without extensive preparation. Excellent for all exterior timbers from decks and hand rails to furniture, pergolas and window frames.

DuraLex clean&BRIGHT CONCENTRATE cleans and rejuvenates bare new and old timber and prepares timber for coating by removing dirt, oils, grease and other contaminants. Particularly useful for weathered timber, it gently helps to remove the surface returning it to its former glory. Economical and easy to use.
